

TEMP PRODUCTS

HEATER CORES

YOUR CUSTOMERS DON'T WANT TO DO THIS JOB TWICE!

Tearing the dash apart to replace the heater core is a time-consuming repair. To ensure that your customers only do the job once, NAPA® Temp Heater Cores are leak, pressure, and vibration tested for trouble-free performance.

ALUMINUM

- Precision bending of pipes for proper fit and installation
- OE tube and fin design for maximum efficiency

MECHANICAL

- High-grade molded plastic tanks and connections

COPPER/BRASS CRIMP TANK

- Premium grade copper/brass to meet OE specifications

COPPER/BRASS V-CELL

- Premium grade copper/brass for OE fit and performance
