HEATER CORES

**NEW
PRODUCT
LINE**

NAPA® Temp Products now offers Heater Cores in all four major styles, giving our customers what they need for a one stop shop supplier. Because of the location behind the dash, Heater Cores are difficult and time consuming to replace. With premium materials and parts that are tested and validated for proven quality and performance, our Heater Cores provide a manufactured unit built to OE fit, form and function.

FULL LINE SOURCE OF THE MAJOR HEATER CORE TYPES

ALUMINUM

Precision bending of pipes for proper fit and installation

OE tube and fin design for maximum efficiency

MECHANICAL

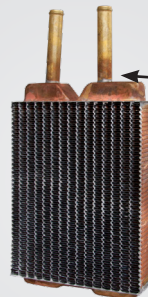

High-grade molded plastic tanks and connections

COPPER/BRASS CRIMP TANK

Premium grade copper/brass and aluminum material to ensure product durability

COPPER/BRASS V-CELL

Heavy duty crimping and brazed connections for positive seals

THE NAPA® TEMP ADVANTAGE:

- ✓ Heavy Duty Construction for Product Durability
- ✓ Manufactured and designed to OE Specifications for Product Durability
- ✓ Nitrogen Leak Pressure Tested for Proven Quality & Performance
- ✓ Chemically Treated Against Corrosion and Pitting
